

## CLAIMS

We claim:

1       1.       A computer user interface comprising:  
2           a plurality of document pages;  
3           at least one of the document pages including at least one link; and  
4           at least one of the links linking to command code such that when one of the links  
5 linking to command code is activated, the command code linked to the activated link is  
6 executed.

1       2.       The computer user interface of claim 1 further comprising:  
2           a Guide Book including a plurality of command descriptions and a plurality of  
3 links that are active command instances, the active command instances being invokable in  
4 place from the Guide Book.

1       3.       A computer user interface for displaying user content documents having  
2 links, the user interface comprising:  
3           a plurality of user interface documents having links; and  
4           a unified navigational context for allowing a user to interact with both the user  
5 interface documents and the user content documents in a unified way by activating the user  
6 interface document links and the user content document links.

1       4.       A computer user interface comprising:  
2           a plurality of document pages;  
3           at least one of the document pages including at least one link; and  
4           a flexible selection model for allowing a user to select the object of a command  
5 either before or after the user selects the command.

1 5. A computer readable medium having computer-executable instructions for  
2 performing the step of:  
3 providing a computer user interface wherein a user  
4 accesses user content documents,  
5 accesses user interface help information, and  
6 executes commands  
7 by activating links on documents pages and wherein user content documents and user  
8 interface documents are presented in a single viewing frame.
